Light and Vitality

INNOSOL Rondo BRIGHT LIGHT THERAPY LAMP

Brings the sun on your table!

INNOSOL Rondo

BRIGHT LIGHT THERAPY LAMP

INNOSOL Rondo is a new and stylish bright light therapy lamp for treatment of SAD (Seasonal Affective Disorder). Its round and harmonic design creates a warm feeling of the sun and summer.

INNOSOL Rondo has the latest lighting technology. A powerful 55 watt TC-2D fluorescent tube disperses the light evenly throughout the entire lamp shade. The surface luminosity is exceptionally low. That is why the light is so comfortable to eyes. Electronic ballast raises the light frequency up to 30.000 Hz resulting in a flicker free, effective and enjoyable light.

INNOSOL Rondo is handy and small in size. You can place it on a table when it rests firmly on its support leg. Due to its compact size, **INNOSOL Rondo** is easy to move around and it takes up little desk space. Furthermore, it can be easily hung on a wall.

The body of the lamp is durable polycarbon plastic and steel. IP44 protection standard allows the safe use also in damp areas.

INNOSOL Rondo has been manufactured in Finland according to high requirements of extreme winter lighting conditions in the North.

Maximum surface luminosity only
10.000 cd / m²

Amount of light lux	Distance from the lamp / cm
2.500	50
5.000	37,5
10.000	25

Note that the required amount of light for therapeutic effect is at least 2.500 lux.

TECHNICAL SPECIFICATIONS

- weight 2,9 kg
- diameter 40 cm
- depth 12 cm
- light source 1x55W 2D fluorescent tube, colour temperature 3.500 K
- polycarbon plastic/steel body
- opaque UV protective, polycarbon glare shade
- charge 230 V, 50 Hz
- electronic ballast
- 2.5 m electric cord with earthed plug
- wall mount option
- max. surface luminosity 10.000 cd/m²
- therapy distance 50 cm (2.500 lx)
